

OPEN SCIENCE CONFERENCE POSTER SESSIONS

POSTER SESSION DAY 1 – MONDAY, 22 AUGUST 2016

Theme	Poster Board Number
MS01. Tropical Antarctic teleconnections	
Assessment of recent trends in southern hemisphere subtropical jet and future projections based on CMIP5 models	1
Composite analysis of ENSO impacts on Antarctica	2
Environmental variations over the southern subtropical coast of Brazil associated with the precipitation anomalies related to the SAM and ENSO	3
Evolution of the eastward shift in the quasi-stationary minimum of Antarctic total column ozone	4
From the tropics to Antarctica: Intrapersonal variability of Antarctic atmosphere and cryosphere driven by tropical convection	5
Gradient change of cyanobacterial diversity in the natural environment revealed by assessment of DNA barcoding gene	6
Ice core evidence of tropical Antarctic teleconnections over the past 300 years	7
Influence of ENSO, ENSO MODOKI and the Indian Ocean Dipole on southern high latitude climate	8
Modulation of the Antarctic Circumpolar Wave and its relationship to large scale modes of variability	9
The role of the tropical pacific in the recent expansion of Antarctic sea ice coverage	10
The temporal distribution of Antarctic Peninsula vegetation based on observation of a tropical ecologist	11
Variations in cyclone density during extreme Antarctic sea ice retraction and expansion	12
S02. Evolution of the physical and biological environment of Antarctica and the Southern Ocean over the 21st and 22nd centuries	
Biogeographic distribution of extant Coccolithophores in the Indian Sector of the Southern Ocean	13
Evaluation of the growth of polymicrobial biofilms developed from soil samples of Signy Island, Antarctica	14
Spatial variations of particulate organic carbon and its isotope distribution in surface waters during summer in Prydz Bay, Antarctica	15
S06. Glaciers and ice sheet mass balance	
Estimating the errors involved in glacier ice-volume computation from ground penetrating radar data	16
Gravimetric mass balance products for the Antarctic ice sheet	17
Mass balance and velocities of the glaciers in vicinity of Bulgarian Antarctic base, Livingston I. Antarctica	18
Surface mass balance of the Ross Ice Shelf: Dating snow layers from radar by using stable isotope analysis	19
The French ITASE Contribution - Recent results	20
S10. Subglacial aquatic environments	
Liquid water beneath cold glaciers - Anomalously warm ice found in the vicinity of blood falls, Taylor Glacier, Antarctica	21
Potential subglacial lakes derived from a new DEM from Cryosat-2 and satellite optical image in the David Glacier, Antarctica	22
Power supply considerations for environmental friendly exploration of Antarctic subglacial lakes using autonomous sonde RECAS	23
Prokaryotic abundance, biomass and metabolism in the brines of an Antarctic perennially frozen lake (Tarn Flat, Northern Victoria Land)	24
Subsurface hypersaline brine discharge from Taylor Glacier in to Lake Bonney at depth	25
The behavior of the drilling fluid in the borehole after the first unsealing of subglacial Lake Vostok	26
The future of Chinese studies on subglacial lakes in Princess Elizabeth Land, Antarctic	27
The major element, nutrient and isotopic geochemistry of the Taylor glacier sub glacial brine	28
The source of sediment organic matter and their Petroleum Geology Significance in northeast waters to Antarctic Peninsula	29
S13. Antarctic meteorology and climatology	
Characteristics of surface meteorology at Lindsey Island, Amundsen Sea, West Antarctica from 2008 to 2014	30
Climate of the Antarctic Peninsula, regional atmospheric circulation and teleconnections	31

OPEN SCIENCE CONFERENCE POSTER SESSIONS

Continuous observations of atmospheric concentrations of carbon dioxide and methane at Base Marambio, Antarctica	32
Mesocyclone activity over the Southern Ocean from satellite infrared mosaics for winter 2004	33
Reconstructions of atmospheric circulation over the Southern Hemisphere and Antarctica	34
The response of lightning occurrence during extreme precipitation over the Antarctic Peninsula	35
Updated analysis of the near-surface air temperature at King George Island, Antarctic Peninsula	36
Using a simple model to improve understanding of the interactions between three phases of water in the climate system	37
Wind lidar measurements of the atmospheric boundary layer in the Weddell Sea	38
World Meteorological Organisations (WMO) Interest in Antarctica	39
S18. Subglacial geology and significant events in the geological evolution of Antarctica	
"South Georgia microcontinent: Preliminary results of RVIB Nathaniel B. Palmer cruise 1408"	40
A long-lived, composite and migrating accretionary orogen revealed from geophysical imaging in Northern Victoria Land, East Antarctica	41
Bathymetric features in west Antarctic Peninsula fjords, implications for glacial ice behavior	42
Cenozoic geodynamic evolution of Tierra del Fuego (Northwestern Scotia Arc) from fracture population analysis	43
Coexisting mylonite and pseudotachylite-pulsating change in rate of strain: Evidence from the veteheia nunatak, cdml, east Antarctica	44
Effective elastic thickness over the Transantarctic Mountains and Ross Sea and its implications for lithospheric structure	45
Erosion-driven uplift in the Gamburtsev Subglacial Mountains of East Antarctica	46
Geophysical survey progress with AWI aircraft since 2014	47
Intraplate earthquakes in East Antarctica outline potential 'rifts' adjacent to the Gamburtsev Subglacial Mountains	48
Late Miocene littoral microfossils from the Fisher Massif, Prince Charles Mountains, East Antarctica	49
Linking subice geology and geophysics- preliminary observations from a segment of Princess Elizabeth Land	50
Neoproterozoic (~900Ma) to late Cambrian (~490Ma) crustal evolution of Fisher Island, Larsemann Hills, Prydz Bay: Implications on collisional orogeny-East Gondwana assembly.	51
New aerogeophysical data - Additional evidences of riftogenic crust in eastern princess Elizabeth land, east Antarctica	52
New aerogeophysical survey explores the South Pole Frontier	53
New magnetic and gravity compilations help trace East Antarctic crustal provinces from the Shackleton Range to Dronning Maud Land	54
Oldest record of nothofagus leaves in Nelson Island, South Shetland Islands, Antarctica: Implicances for biogeography	55
Re-interpretation of geological evolution of Larsemann Hills, Prydz Bay in the context of supercontinent reconstructions	56
Ross Ice Shelf seismic survey: Bathymetry, sediments and deeper structures	57
Tectonic evolution of the Lanterman-Mariner Suture Zone, northern Victoria Land, Antarctica: insights from the structural and petrographic features	58
The Gamburtsev Province as part of a major ca 1000 Ma accretionary belt in interior East Antarctica?	59
S20. Observing and mapping the Antarctic continent	
A new seamless digital geological 1:250 000 scale map of Dronning Maud Land: progress report	60
Calculation of gravity terrain and isostatic corrections based on BEDMAP2 and their applications in Antarctica	61
Comparison of Sr and Nd isotope data from the Namuno Terrane of Mozambique with data from Dronning Maud Land, Antarctica.	62
Comparison of SSMIS and AMSR2 sea ice concentration in the Amundsen Sea, West Antarctica, with KOMPSAT-5 SAR images	63
First digital geological map dataset of Marie Byrd Land: A product of the SCAR GeoMap project	64
First digital geological map dataset of northern Victoria Land: a product of the SCAR GeoMap project	65
Geochemistry of sediments in Crepin point: Towards environmental base line in Machu Picchu Peruvian Antarctic station. King George Island	66
GeoMap progress towards a digital dataset of the Antarctic rock exposures	67
Glacial geomorphological mapping of western dronning Maud land, Antarctica	68
Heat flow of Scotia Sea from magnetic anomaly data	69
Remote Geologic Mapping of the Antarctic using Orbital Multispectral Imagery	70

OPEN SCIENCE CONFERENCE POSTER SESSIONS

Scan basin seafloor spreading magnetic anomalies: New insights on the central scotia sea geodynamic evolution	71
Supraglacial debris and stream extraction by synergetic usage of spectral-spatial-textural information in high-resolution satellite imagery	72
Terrestrial Data Analysis for the Ross Sea region	73
The SCAR Antarctic Digital Database - Freely available topographic data for mapping, science and operations planning	74
Variations in glacier fronts positions and ice-free areas at the northern tip of the Antarctica Peninsula between 1988 and 2015	75
S24. Physiological adaptations in Antarctic organisms	
Are Antarctic plants more tolerant to stress than others? A world-wide comparison	76
Chemical defenses of Antarctic sponges	77
Design and structural characterisation of antifreeze peptides from type i shorthorn sculpin, <i>myoxocephalus scorpius</i>	78
Diffusive and biochemical limitations to photosynthesis in Antarctic plants from two populations in Antarctica	79
Effect of temperature on the growth and photosynthetic performance of Antarctic and tropical <i>Chlorella</i> species.	80
Effects of different silica levels on the growth rate and photosynthesis of polar diatom <i>Chaetoceros neglectus</i>	81
Energetic adaptations of the Antarctic silverfish <i>Pleuragramma antarcticum</i>	82
Extreme phenotypic plasticity in metabolic physiology of Antarctic demosponges	83
Growth and extracellular enzyme production in marine fungi from different latitudes in response to varying temperature	84
Heat shock protein expression in immune cells of Antarctic sea urchin by stress inductors.	85
How efficient and thermally flexible is the toxicant metabolism of Antarctic notothenioid fish?	86
Impact of diurnal freeze - Thaw cycling on Antarctic Tardigrade mortality	87
Major transcriptional shifts in the Antarctic yeast <i>Rhodotorula</i> sp. Usm-psy62 in response to temperature stress	88
Photosynthetic performance in Antarctic plants: Effects of in situ warming	89
Physiological and molecular stress response in <i>Nothothenia rossii</i> : modulation of in vivo and in vitro HPI sensitivity by environmental challenges	90
Physiological response of <i>Chlorella</i> and <i>Chlamydomonas</i> species from different latitudes towards ultraviolet radiation (UVR)	91
Production of omega-3 long chain polyunsaturated fatty acids and characterization of natural compounds from <i>Glaciozyma</i> Antarctica	92
Shedding light on the dominance of cryptophytes in Antarctic coastal waters: A case study in Gerlache Strait	93
Use of oxidative stress enzymes as a biomarker for assessment of environmental stress on sea ice algae from Peninsula Antarctic	94
S29. From the top: Higher trophic predators as ecosystem sentinels	
Antarctic pack ice seals and oceanographic features at the Filchner Outflow System, southern Weddell Sea	95
Current knowledge of Antarctic wildlife pathogens: Identification of gaps and opportunities for research	96
Distribution, habitat and trophic ecology of Antarctic squid <i>Kondakovia longimana</i> and <i>Moroteuthis knopovitchi</i> : inferences from predators and stable isotopes	97
Movements and diving of satellite-monitored fin whales off the Antarctic Peninsula	98
Re-evaluating the role of seals in the trophic webs of the western Antarctic Peninsula	99
Temporal shift in the isotopic niche of female Antarctic fur seals from Bouvetøya	100
Vibrissae of juvenile southern elephant seals <i>Mirounga leonina</i> as matrix for obtaining fine-scale, time-based dietary information	101
Video-loggers reveal the significance of jellyfish as food for Adélie penguins	102
S35. Data access and sharing for cutting edge science	
Antarctic data and information for Canada: The polar data catalogue	103
Arctic present climatic change and past extreme events	104
BCO-DMO: Southern ocean marine ecosystem data and more	105
Italian Polar Data and Metadata Infrastructure (IPDMI) A digital infrastructure to collect, manage, publish and share polar research results	106
Marine mammals in the Southern Ocean – How WebGIS technology and GIS infrastructure supports data visualization, publication and sharing	107
Online sea ice data platform: www.seaiceportal.de	108

OPEN SCIENCE CONFERENCE POSTER SESSIONS

Sea stars field guides: A proof of concept for opening more data	109
South African data portal for polar and high latitude polar research data	110
Spatial database development based on metadata and GIS software: applications for Terrantar Center	111
The Antarctic data management system, making scientific research in Antarctica discoverable	112
The EU-PolarNet/COMNAP/INTERACT Polar infrastructure database cooperation: facilitating the management of Polar logistics and promoting science access	113
The U.S. Antarctic Program Data Center (USAP-DC): Recent results and new developments	114
S41. Evidence based conservation and environmental management in Antarctica	
Antarctic environmental challenges: the effectiveness of the protocol on environmental protection to the Antarctic treaty	115
Everything as usual at Fildes Peninsula? Ongoing environmental shortcomings in environmental management	116
Measuring the environmental cost of science in Antarctica	117

POSTER SESSION DAY 2 – TUESDAY, 23 AUGUST 2016

Theme	Poster Board Number
S08. Solid earth responses and influences on cryospheric evolution	
A set of vertical Antarctic GPS velocities	1
Antarctic crustal thickness and bedrock elevation	2
Application of satellite remote sensing data for geological mapping in Antarctic Peninsula	3
Characteristic seismic tremors with harmonic overtones in the Lützow-Holm Bay, East Antarctica: 2014-2015	4
Crustal motion measurements from the POLENET Antarctic Network: comparisons with glacial isostatic adjustment models	5
Crustal velocity solutions in polar environments: GPS position errors caused by ice in antennas	6
GEOICE- A Next Generation Polar Seismic Observatory: Field tests of sensor and power systems	7
GNSS observations on outcrop areas around Syowa Station, East Antarctica	8
Ice mass loading and deformation structures under grounded ice sheets: Examples from the and-1b and and-2a cores	9
Incomplete separability of Antarctic plate rotation from glacial isostatic adjustment deformation within geodetic observations	10
Investigating the tectonic and erosional evolution of the Shackleton Range region in East Antarctica	11
Problem of glacial isostasy during Quaternary	12
Seismic investigations of the Northern Transantarctic Mountains: The TAMNNET deployment	13
VLNDEF: An integrated geodetic project and its latest results	14
S17. Astronomy and astrophysics from Antarctica	
AST3 Survey in 2016	16
Correlating dark matter simulations to SPT clusters & other extragalactic surveys	17
Future power systems for remote astronomical observatories in Antarctica	18
Meteorological data from KLAWS-2G for astronomical site survey at dome A, Antarctica	19
PAIX the first robotic Antarctic mission: Towards an understanding the stellar pulsation and evolution.	20
The G332 molecular cloud ring - A terahertz tale from Antarctica	21
THz solar photometers on a stratospheric trans-Antarctic balloon flight	22
S21. Remote sensing of the Antarctic environment: Multi-disciplinary advances	
An algorithm for automated identification of Adélie penguin colony area from satellite imagery	23
An improved remote sensing backscattering model for the identification of scattering mechanisms in sea ice and snow layers	24
DNA analysis of surfactant associated bacteria in the sea surface microlayer in application to satellite oceanography	25
Empirical modelling of bathymetry of Antarctic lakes using high-resolution multispectral imagery	26
High resolution DEM generation using UAV images in Barton Peninsula, King George Island, Antarctica	27

OPEN SCIENCE CONFERENCE POSTER SESSIONS

High resolution digital elevation model of an ice-free area of Maritime Antarctica obtained by laser scanner	28
High resolution radar data used to detect human-induced features on Ardley Island and part of Fildes Peninsula, South Shetland Islands	29
Mapping penguins by Drone – How to count breeding pair numbers from orthophotomosaics	30
Phytoplankton dynamics in Lake Bonney through the polar night measured by an autonomous in situ profiler	31
Support of research vessels in the Antarctic with NRT radar information: an innovative service at DLR's Antarctic station GARS O'Higgins	32
Surface characterization using a photon counting Lidar in East Antarctica	33
The time-space variability of pCO ₂ in the Southern Ocean during the 26th CHINARE cruise in 2009	34
Ultra-high resolution baseline vegetation map of the forefield of the Sphinx glacier, Admiralty Bay area, King Gorge Island	35
Vegetation mapping on King George Island using Unmanned Aerial Systems (UAS)	36
S23. Microbes, diversity, and ecological roles	
A polyphasic strategy incorporating genomic data for the taxonomic description of two species of <i>Pseudanabaena</i> from Arctic and tropics	37
A review on sea-ice micro-algae for modeling purposes: Linking functional traits to production parameters.	38
Agarolytic and carrageenolytic activities of fungi associated with macroalgae from Antarctica	39
Antarctic rocks: An unexpected microhabitat of potential innate virulent fungi "trapped" and/or hidden in a polar desert of continental Antarctica	40
Antibiotic resistance profiles of bacteria from King George Island and Deception Island	41
Antimicrobial properties and the influence of temperature on secondary metabolite production in cold environment soil fungi	42
Characterization of Antarctic <i>Flavobacterium</i> strain with agarase and alginate lyase activities	43
Characterization of <i>Leptolyngbya</i> and <i>Phormidium</i> diversity in Antarctic biotopes	44
Characterization of psychrotroph <i>Streptomyces</i> sp. strain with antimicrobial and anticancer activities isolated from Fildes Peninsula.	45
Cold adaptation of a family I.3 lipase isolated from an Antarctic <i>Pseudomonas</i>	46
Cold-active extracellular amylase production in Cassava starch from novel Antarctic bacteria	47
Corrosion in aluminum alloy mediated by microorganisms found in the corrosion product of an aircraft operating in Antarctica	48
Cyanobacterial diversity in soil crusts in the Sør Rondane Mountains	49
Cytotoxicity of active compounds isolated from <i>barrientosiimonas humi</i> towards human colon cancer cell line	50
Cytotoxicity of extracts from a marine strain isolated from Antarctic on <i>Staphylococcus aureus</i> , <i>Candida albicans</i> and human cancer cell lines	51
Distribution of prokaryotic communities and <i>nifH</i> gene diversity in the extreme Darwin Mountains, Antarctica	52
Diversity and community structures of prokaryotes and eukaryotic microbes in Antarctic freshwater glacial lake	53
Diversity of bacteria of the Fildes Peninsula: Baseline survey for future monitoring of diversity shifts under simulated warming	54
Diversity of polar soil fungi	55
Diversity, thermal characteristics and hydrolase enzyme from polar soil fungi	56
Effectiveness of a bacterial consortium isolated in the Antarctic Peruvian Base "Machu Picchu" on the bioremediation of hydrocarbons contaminated soils in terrarium level	57
Fungal communities present in ornithogenic soils of Antarctic Peninsula: diversity, distribution and potential innate virulence	58
Genetic diversity of psychrophilic microorganisms and their ability to make microbial consortia	59
Growth inhibition of <i>Phoma</i> spp. fungi by bacteria B2Y4 from Antarctic soils	60
Growth performance, total protein and carbohydrate of Arctic and Tropical <i>Pseudanabaenaceae</i> during different growth phases of a batch culture experiment	61
Investigating cyanotoxin production from three decades deep freeze Antarctic cyanobacterial mats	62
Isolation and biochemical characterisation of bacteria isolated from soil samples from Signy islands using defined and complex media	63
Isolation of cold-active protease - Producing microbes from Antarctic freshwater lakes	64
Kinetic profiles of molybdate-reducing enzyme from an Antarctic microbial isolate	65
Malaysian expedition to the Antarctic Peninsula for the collection of algae	66

OPEN SCIENCE CONFERENCE POSTER SESSIONS

Metallomics of Psychrophilic Yeast <i>Glaciozyma Antarctica</i>	67
Microbial oceanography of the different southern ocean water masses	68
Novel actinobacterium strain S63 isolated from Signy, Antarctica	69
Phylogenetic analysis and implications of microbial communities in deliquescent wet patches within Taylor valley, Antarctica	70
Production of cold adapted hydrolytic enzyme from a polar microorganism	71
Quantification of cold adapted lipase genes from Signy station, Antarctica via QPCR	72
Spatial diversity of glacier ice bacteria from King George Island (NW Antarctica)	73
Stable Isotope Probing sheds light on the McMurdo Dry Valley soil food web	74
Taxonomic characterization and bio-potentials of bacteria and yeasts isolated from Nella Lake sediments, East Antarctica	75
The study of anticancer properties of bioactive fractions produced by a novel Antarctica actinobacteria, <i>barrientosiimonas humi</i>	76
S27. Impacts of environmental changes on Antarctic ecosystems and biota	
A conspicuous massive growth of benthic diatoms on benthic megafauna in Marian Cove, an Antarctic fjord on King George Island	77
Across the Antarctic Peninsula to the continent- microclimate characterisation of habitats of the lichen species <i>Usnea antarctica</i> and <i>U. lambii</i>	78
Assessing the relationship between sponge assemblages and canopy-forming algae in shallow-water rocky reefs in the Western Antarctic Peninsula	79
Biogeochemical characteristics of hydrologically connected and isolated cryoconite holes in coastal Antarctica	80
Biogeography of phytoplankton pigments around the tip of the Antarctic Peninsula	81
Changes in the composition, abundance and distribution of the vascular herbaceous vegetation of the Sierra de los Cuchumatanes, that already exists in the Antarctic and possible relation to climate change	82
Combined effects of temperature and ultraviolet radiation on the growth, pigmentation and oxidative stress response of polar and tropical <i>Chlorella</i>	83
Continuous Measurement of CO ₂ Flux from Dry Valley Soils: Determining Its Source and Environmental Controls	84
Diatom distributions delineated by lipid, genomic and microscopic observations: the imprint of past summer sea ice extent.	85
Ecological research of James Ross Island. Ecosystem components-based approach to study structure and function of Antarctic vegetation oases.	86
Effects of ultraviolet irradiation in pteropods, chaetognaths and salps in Admiralty bay, King George island, Antarctica (summer 2009/2010)	87
From pole to pole: The potential for the Arctic seastar <i>Asterias amurensis</i> to invade a warming Southern Ocean	88
Glacier retreat and its consequences to coastal benthic ecosystems.	89
Implementing species distribution models for exotic springtail species in Antarctica: an unexplored tool to assess invasion risk	90
Microalgae diversity along an Antarctic glacier forefield	91
Miming global warming. A transcriptomic study to explore how <i>Colobanthus quitensis</i> (Kunth) Bartl. defend itself from heat stress	92
Modelling abiotic Antarctic soil CO ₂ fluxes	93
Monitoring lichen and moss activity at subzero temperatures using chlorophyll fluorescence.	94
Non-Antarctic notothenioids: Past phylogenetic history and contemporary phylogeographic implications in the face of environmental changes	95
Photosynthetic performance and genomic response of <i>Chlorella</i> species from different origins, to ultraviolet radiation (UVR)	96
Photosynthetic response of sea ice microalgae (<i>Navicula directa</i> and <i>Navicula glaciei</i>) to changes in CO ₂ .	97
Predictions of macroalgae habitat shifts due to climate change impact in an Antarctic Peninsula fjord	98
Research initiative of Kopri on ecosystem responses to climate change in the northern Victoria Land Coast	99
Response of megafaunal and macrofaunal benthos to collapse of the Larsen A Ice Shelf along the Antarctic Peninsula	100
Spatial-temporal variation in trophic relationships of a drifting species in the vicinity of the Prince Edward Islands	101
Species on the move in East Antarctic terrestrial communities	102
The impact of environmental changes on microbial nitrifiers in the McMurdo dry valleys	103

OPEN SCIENCE CONFERENCE POSTER SESSIONS

The influence of global warming on <i>Colobanthus quitensis</i> reproduction	104
The influence of the natural environment on habitat preference for lichens in Western Dronning Maud Land, Antarctica.	105
The temperature sensitivity of two contrasting Antarctic soils in response to climate change: preliminary results	106
Unreported N ₂ O sink in marine (sub-) polar systems	107
S31. Ocean acidification	
Distribution of anthropogenic carbon in the Bransfield and Gerlache Straits (Antarctic) waters during austral summer 2015	108
Lipid use in the lecithotrophic larvae of <i>Laternula elliptica</i> under pH and temperature stress	109
Mesoscale variability in the carbonate system chemistry and CO ₂ air-sea fluxes of the Ross Sea (Antarctica) shelf area.	110
S32. Human biology and medicine	
An association analysis between psychophysical characteristics and genome-wide gene expression changes in human adaptation to the Antarctic Dome Argus	111
Association between urinary status and psychological mood states at Syowa Station, Antarctica	112
Behavioural health in extreme environments: normal reactions to an abnormal environment	113
Influence of ecological conditions from Antarctica on human erythrocytes viability. Preliminary report.	114
Neurotrophin-3 as a support marker in evaluating the haemoleucogram changes in Romanian polar expeditioners	115
Relationship between mood states and ego states experienced by a Japanese wintering party in Antarctica	116
Telemedicine in Indian scientific expeditions to Antarctica	117
The other "forgotten" population in extreme environments: Psychological experiences and well-being of non-deployed staff	118
The third-quarter phenomenon in Antarctica: The relationship between mood, job, and personality	119
S36. Antarctic education, outreach and training	
"Advances in polar science's call for papers--Advances in polar science is changing and improving"	120
Biological adaptations to environmental change in Antarctica - An advanced training program for early career scientists	121
Challenges for the video classes production for the popularization of the Brazilian Antarctic research	122
Challenges in educational game development on polar science	123
Communicating Antarctic scientific and environmental information to the scientific community and decision factors	124
Education and outreach activities of the United States Antarctic Program	125
Educational outreaches of the CzechPolar project and associated activities within the Czech Antarctic Programme	126
E-learning course on the Antarctic environment: An interdisciplinary and collaborative production	127
Expedition to the South Pole: a role play for pupils	128
Ice Flows: A Game-based Learning approach to Science Communication.	129
Lost information on a new continent: What do newspapers tell us about Antarctica?	130
Outreach programs on polar science by NIPR, Japan	131
PORTUGAL EDUCATION AND OUTREACH: bringing polar science to wider audiences	132
Texts production for a distance learning course on Antarctica - dialogic training for basic education teachers	133
The marine fauna and flora of Terra Nova Bay (Ross Sea): a book for the recognition of Antarctic coastal species	134
Valorization of national and international polar education and outreach programs to disseminate Antarctic information	135

OPEN SCIENCE CONFERENCE POSTER SESSIONS

POSTER SESSION DAY 3 – WEDNESDAY, 24 AUGUST 2016

Theme	Poster Board Number
MS02. Connecting the biological and the physical: Environmental drivers of biodiversity in Antarctica	
An environmental role in assembling cyanobacterial mat communities in ponds of the McMurdo Sound region, Antarctica	1
Bacterial population profiles of inland nunataks in Dronning Maud Land, Antarctica.	2
Cape Adare – A sentinel for change in Antarctica	3
Detection of toxin-encoding genes from terrestrial cyanobacteria isolated from Signy Island, South Orkney Islands, maritime Antarctic	4
Dial changes in community structure and function in coastal waters of the Southern Ocean during austral summer	5
Did stepping-stone dispersal along the Scotia Arc cause the faunal similarity between Antarctica and South-America? A molecular case study	6
Distribution patterns of seabirds in Southern Ocean and Antarctica with reference to climate change	7
Diurnal activity of Antarctic soil arthropods relative to environmental conditions and genomic characteristics: Implications for a changing climate	8
Effects of freeze thaw cycles on bacterial diversity in polar and tropical soils	9
Feeding ecology of Antarctic krill (<i>Euphausia superba</i>) in the Antarctic Peninsula in the autumn-winter using stable isotope analysis	10
Genetic diversity of the Antarctic pearlwort <i>colobanthus quitensis</i> (Caryophyllaceae)	11
Hydrographic characteristics in the Gerlache strait during summer 2016	12
Oceanographic characteristics of Bahía Paraíso during summer 2016	13
Semi-automated Antarctic vegetation monitoring using digital photography	14
Solar heating, microclimate, and the formation of peat-accumulating ecosystems in Antarctica	15
The Antarctic Marginal Sea Ice Zone: A physical characterization and the link to biology	16
The fauna of the hydrothermally active Kemp Caldera (South Sandwich Arc, Antarctica): Biodiversity and biogeography	17
The role of sea-ice associated fauna for ecosystem functions in the Weddell Sea, Southern Ocean	18
S03. Sustained efforts for observing, mapping and understanding the Southern Ocean and its role in current and future climate	
Aerosol trace metal concentration and dissolution from known dust sources in Southern Africa	19
Assessing the role of iron and light on phytoplankton production and air-sea CO ₂ fluxes in the changing western Antarctic Peninsula.	20
Austral summer N ₂ O sink and source characteristics and their impact factors in Prydz Bay, Antarctica	21
Bathymetry and geological setting of the Drake Passage: The new map	22
CDW intrusion onto the Prydz Bay shelf	23
Characteristics of suspended particulate organic matter in Subtropical Front of the Indian sector of Southern Ocean: Influence of eddies.	24
GPS RO sensing of Boundary Layer Height in the Southern Ocean	25
IBCSO – Collaborative bathymetric base data for Antarctic science	26
L'Astrolabe for Science an initiative to get an alternative boost to Antarctic and southern ocean observations.	27
Microbial lipids for Southern Ocean paleo-thermometry	28
Monitoring from Antarctic coastal embayment; underutilized opportunity to link with Southern Ocean observation	29
Physical control on the summer chlorophyll - A distribution in the Indian sector of Southern Ocean	30
Position of main ACC fronts south of New Zealand from satellite altimetry and XBT data in the period 1994-2015	31
Response of Southern Ocean phytoplankton to iron and light limitation	32
Seasonal variations of Shelf Water and their connection with the atmosphere in Prydz Bay, East Antarctica	33
Temporal variability of the Circumpolar Deep Water inflow onto the Ross Sea continental shelf	34
The distribution and controls of bioactive trace elements (Cu and Zn) in the Atlantic Sector of the Southern Ocean.	35

OPEN SCIENCE CONFERENCE POSTER SESSIONS

The integrated mathematical modeling and visualization of southern ocean movement based on navier-stokes, heat and salinity equations	36
S09. Status and trends in Antarctic sea ice and ice shelves	
Antarctic ice thickness variation and safety of ship hull for different ice classes	37
Atmospheric forcing of sea ice concentration and velocity anomalies in the Ross Sea Polynya region	38
Confirmation of Ice Pump that spans the Ross Ice Shelf: Heat and nutrient exchange between open ocean and grounding zone	39
Cycling of organic sulphur and carbon in Antarctic sea ice and surrounding waters	40
Dominant signals in the Southern Ocean and Antarctic sea ice modulation during last three decades	41
Estimation of Antarctic land-fast sea ice algal biomass from under-ice spectra: the effects of proximity of an ice shelf	42
Fast ice dynamics in McMurdo sound	43
Photosynthetically Active Radiation, chlorophyll-a and other biogeochemical changes along a 5 km transect under the sea ice of McMurdo Sound	44
Ross ice shelf Polynya – Contribution to Antarctic sea ice variability	45
Simulations of ice flux through Totten Glacier as ice shelf calving changes	46
Simultaneous disintegration of outlet glaciers in the Porpoise Bay region of East Antarctica, driven by sea ice break-up.	47
Slush fund: Investigating the impact of multiphase physics in icy shells	48
The area changes of Terra Nova Bay Polynya from 2009 to 2014 based on the estimation of sea ice distribution	49
S25. Molecular ecology and evolution	
A pharmaceutical composition for treating cancer through nanoemulsions	50
Barcoding Southern Ocean lantern fish, myctophidae and othe mesopelagic fish	51
Genetic diversity among shallow-water benthic foraminifera across the Drake Passage	52
Genome of Antarctic-endemic copepod and evolutionary adaptation to extreme environments	53
How connected are populations of Snow Petrels (<i>Pagodroma nivea</i>) in East-Antarctica?	54
Life history evolution in Antarctica: Elemental stoichiometry and the growth rate hypothesis	55
Phylogeographic patterns of the bipolar lichens <i>Polycauliona candelaria</i> (Teloschistaceae) and <i>Sphaerophorus globosus</i> (Sphaerophoraceae)	56
The genetic diversity and distribution of diaspores at an Antarctic inland site - future perspectives by global change?	57
S28. Diversity and distribution of life in Antarctica	
A new land mammal locality from the Eocene of Seymour Island, Antarctica	58
A population of 'giant' Dollo's plunderfish <i>Dolloidraco longedorsalis</i> in the Banana Trench, West-Antarctic Peninsula	59
Abundance and distribution of echinoderms in coastal soft-bottom habitats at Deception Island (South Shetland Islands, Antarctica): dominance of opportunistic sediment-feeders	60
Atmospheric linkages and the potential for dispersal of bryophytes in the Antarctic Peninsula region and South Atlantic	61
<i>Bartramia patens</i> Brid : Aan endemic moss from Antarctica?	62
Biogeographic review of carnivorous sponges in the Southern Ocean	63
Chemical ecology in the Antarctic nudibranch <i>Charcotia granulosa</i> (Gastropoda: Heterobranchia: Charcotiidae)	64
Development an analytical method of RGB data for vegetation survey of terrestrial ecosystem on Antarctica	65
Distribution of short-finned squid <i>Illex argentinus</i> (Cephalopoda: Ommastrephidae) inferred from the diets of Southern Ocean albatrosses using stable isotope analyses	66
Distribution of zooplankton groups by simultaneous acoustic-biological sampling around San Pedro Island, South Georgias Is., during autumn, 2013.	67
Diversity of the aerobic anoxygenic phototrophy gene <i>pufM</i> in Arctic and Antarctic coastal seawaters	68
Environmental connotations of diatom and benthic foraminiferal assemblages from coastal West Antarctica	69
Environmental drivers of spatial changes in marine productivity in the Gerlache Strait (Antarctica) during January 2015.	70
Eocene whales from the La Meseta Formation, Antarctica: Clues on the radiation of Pelagiceti in the Southern Hemisphere.	71
Exploring the heterogeneity of Antarctic biodiversity data in space and time	72

OPEN SCIENCE CONFERENCE POSTER SESSIONS

Feeding selectivity in <i>Notothenia coriiceps</i> and <i>N. rossii</i> (Pisces, Nototheniidae) on amphipod species at Potter Cove, South Shetland Islands, Antarctica	73
First results of the SO-AntEco expedition	74
First step to eradication of <i>Poa annua</i> L. from Arctowski Oasis (King George Island, South Shetlands, Antarctica)	75
Functional response of <i>Blechnum penna-marina</i> to desiccation in tundra environments	76
Glacial dropstones enhance megabenthic habitat diversity and species richness in west Antarctic Peninsula fjords	77
Glacial Refugia as a Means of Nematode Survival during the Last Glacial Maximum	78
Glass sponge distribution in relation to abiotic factors and predators – a large-scale regional study in the Weddell Sea, Antarctica	79
High abundance of the epibenthic trachymedusa <i>Ptychogasteria polaris</i> in subpolar fjords along the West Antarctic Peninsula	80
Highest diversity of cyanobacteria on granite substrates in the Sør Rondane Mountains	81
Is <i>Bryum pseudotriquetrum</i> a bipolar moss species?	82
Jurassic marine fishes from longing gap, Antarctic Peninsula: 2016 fieldwork report	83
Macroinvertebrates associated with two Antarctic macroalgae, the role of habitat complexity	84
Modelling tag loss of two species of fur seals at Macquarie Island	85
New metatherian mammal from early Eocene levels of the la Meseta Formation, Antarctic Peninsula	86
Paleontological inheritance of West Antarctica: Preliminary report of the newly found Mesozoic/Cenozoic fossil vertebrates from Antarctic Peninsula	87
Patterns in East Antarctic zooplankton diversity: What can structural and compositional aspects of biodiversity tell us?	88
<i>Pohlia</i> Hedw. (Bryophyte-Mniaceae) in Antarctic region: diversity and bipolarity.	89
Prokaryotic communities in brine pockets of three frozen Antarctic lakes (Tarn Flat and Boulder Clay, Northern Victoria Land)	90
Temporal, spatial, and sampling heterogeneities in species distribution modeling. The case study of the data-poor area of the Kerguelen Plateau.	91
Terrestrial diatom communities from Ulu Peninsula (James Ross Island, NE Antarctic Peninsula)	92
The BCCM/ULC collection: a Biological Resource Center to give access to the Antarctic cyanobacterial diversity	93
The first record of manta ray (Myliobatiformes, Mobulidae) in the Eocene of Antarctica	94
The macrofauna of the ESR hydrothermal vents: status update on taxonomic descriptions	95
The tiniest penguin (Aves, Sphenisciformes) from the Eocene of Seymour Island, West Antarctica	96
S40. Environmental contamination in Antarctica	
Antibiotic resistance in <i>Escherichia coli</i> strains isolated from Antarctic bird stools, wastewater and seawater samples taken in the Antarctic	97
Chemical composition of <i>Pygoscelis adeliae</i> feathers assessed by X-ray fluorescence	98
Dissolved black carbon in Antarctic lakes: Chemical signatures of past and present sources	99
Hydrocarbon-contaminated soil bioremediation in Antarctica: Effectiveness of two consecutive year's field assays in Carlini Station	100
Isolation and screening of diesel-degrading Antarctic bacteria for bioremediation purposes	101
Mercury and methylmercury in the Atlantic sector of the Southern Ocean: Results from Eddy Pump - ANTXXVIII/3 cruise	102
Organic contaminant concentrations in sub-tidal sediments in the vicinity of Palmer Station 25 years after the Bahia Paraiso spill.	103
Phenol degradation and heavy metals tolerance of Antarctic yeasts	104
Physicochemical characteristics of Antarctic ambient aerosol and sedimentary aerosol	105
Screening and isolation of Antarctic phenol-degrading bacteria	106
Temporal and spatial distribution of polycyclic aromatic hydrocarbons in terrestrial soils of Antarctica	107
The influence of migratory flyways in the distribution and levels of metals in Antarctic flying seabirds	108

OPEN SCIENCE CONFERENCE POSTER SESSIONS

POSTER SESSION DAY 4 – THURSDAY, 25 AUGUST 2016

Theme	Poster Board Number
S01. Antarctica in a global system - drivers and responses	
Antarctica in the global earth system: From the poles to the tropics	1
Changes in ocean heat content on Antarctica's regional seas from ocean reanalysis	2
Decline of AABW production in the 20th Century	3
Distribution of limno-terrestrial rotifers supports need for complex Antarctic conservation biogeography	4
Distribution of NADW and AABW source varieties in the Atlantic Ocean	5
Dynamic response of the Ross Ice Shelf to environmental forcing	6
Linking iron marine chemistry with bioavailability in the Southern Ocean	7
Miocene major events in tectonic and oceanographic contexts: Example from south Scotia Sea basins (Antarctica)	8
Modelling sea ice formation in the Terra Nova Bay polynya	9
Sea ice, cloudiness and surface air temperature: Relationships in the Antarctic and Arctic regions from observations and model simulations	10
S05. Past Antarctic climate and ice sheet dynamics: integrating models and observations from the deep ice to the deep sea	
Abrupt Antarctic ice-sheet collapse – Past reconstruction and future implications	11
Anvers-Hugo Trough paleo-ice stream, Antarctic Peninsula: Geomorphological evidence for the importance of water availability in facilitating ice stream flow	12
Dating the un-datable: Pushing radiocarbon dating in marginal marine Antarctic sediments to new limits	13
Depositional processes on the eastern Ross Sea slope and rise: Slides, mounds, presence of fluids.	14
Evolution of a fjord depositional environment: Insights into climate change at the Subantarctic Auckland Islands, New Zealand	15
Foraminiferal radiocarbon dates from the Ross-Bank death assemblage: insights into WAIS decoupling and ice-shelf retreat in Glomar-Challenger-Basin and Pennell-Basin paleo-ice-streams.	16
Holocene climate change recorded in laminated sediment cores from Moubray Bay, Northern Victoria Land, Antarctica	17
Ice core records from the Amundsen / Bellingshausen Sea Coastal Domes – Scientific Priorities and logistical challenges	18
Large-Ensemble modeling of Antarctic Ice Sheet variations with a coupled ice-Earth-sea level model	19
Last Glacial - Holocene Climate Variability in the Southern Ocean Atlantic sector: Implications of West Antarctic Ice Sheet dynamics	20
Late Neogene sediment properties in the Wilkes Land continental rise (IODP Exp. 318 Hole U1359A), East Antarctica	21
Late Quaternary sedimentation patterns in Ona Basin, southern Scotia Sea, Antarctica: Preliminary results	22
Limited glaciation of the New Zealand subantarctic islands during the Last Glacial Maximum	23
Mid to Late Holocene ice discharge in the Bransfield Strait, Antarctic Peninsula region and its tele-connection with ENSO	24
Optical dust logging for million-year ice	25
Paleobathymetry of Southern Ocean and its role in paleoclimate and paleo-ice sheet variations: call for a sequence of paleobathymetric grids	26
Paleoclimate implications during LGM from cores collected off Coulman High, western Ross Sea, Antarctica	27
Postglacial records of southern hemisphere westerly wind variability from the New Zealand Sub-Antarctic Auckland Islands	28
Post-LGM calving-front and grounding-line migration within the Whales Deep paleo-ice-stream trough, eastern Ross Sea	29
Pre-glacial to full glacial sedimentation along the Pacific margin of West Antarctica: Record of shifting pattern of supply and transport	30
Radar isochronic dating for the deep ice core site of Kunlun Station, Antarctica	31
Record of Holocene paleoclimate change in outer Bigo Bay, West Antarctic Peninsula	32
Record of late neogene and quaternary paleoenvironmental and paleoclimatic conditions in southwest pacific sector of the southern ocean: Preliminary results	33

OPEN SCIENCE CONFERENCE POSTER SESSIONS

Recoverable autonomous thermal sonde for in-situ dating of glacier ice	34
Sea ice and seasonality on the East Antarctic margin: A high-resolution Holocene diatom and geochemical reconstruction from the Adélie Drift	35
Sedimentological evidences of enhanced bottom-currents developed across the Tasman Gateway from the Late Eocene to Oligocene-Miocene Transition.	36
Subglacial and glacial marine bedforms on the continental shelf of the SE Weddell Sea: New findings from RV "Polarstern" expedition PS96	37
The Sabrina Coast Flora: A new, unique floristic assemblage from East Antarctica	38
West Antarctic Ice Sheet retreat in the eastern Ross Sea – A post-LGM deglacial chronology from foraminiferal radiocarbon dates	39
What do McMurdo Dry Valleys paleolake deltas really tell us about grounding line position? New Insights from Garwood Valley	40
S11. Antarctic permafrost, periglacial processes and soil development	
Active layer hydrologic controls on the geochemistry of Lake Vanda, Antarctica	41
Active layer thermal and moisture regime of Keller Peninsula, Maritime Antarctica: a case study	42
An environmental magnetic approach to understand pedogenesis in Larsemann Hills, East Antarctica	43
Austral winter imaging of Don Juan Pond: Polar desert brine flow at -40°C	44
Chronosequence of ornithogenic, volcanic soils on olivine basalts from Barrientos Island, maritime Antarctica	45
Dust distribution in the SW Ross Sea, Antarctica	46
Fractal dimension to evaluate the spatial variability of soil attributes in a typical periglacial area of Maritime Antarctica	47
High-resolution imagery acquisition with an UAV for mapping the ice-free areas of Barton Peninsula (King George Island, Antarctica)	48
Hydrochemistry of groundwater suprapermafrost in the Machu Picchu aquifer	49
Impact of periglacial processes on rocky coast geomorphology in Admiralty Bay, King George Island, Antarctic	50
Is rock varnish from the McMurdo Dry Valleys the result of the interplay between dust accretion and biogeochemical weathering?	51
Mapping of periglacial and other surface features using polarimetric RADARSAT-2 data in Cape Lamb, Vega Island, northern Antarctic Peninsula region	52
Microbial assemblage and metabolism in the brines of two Antarctic frozen lakes (Boulder Clay, Northern Victoria Land)	53
Projecting Potential Distribution Model of <i>Sanionia uncinata</i> (Hedw.) Loeske for two Holocene periods in the Fildes Peninsula, King George Island.	54
Prokaryotes in Antarctic permafrost: abundances and metabolism in the Northern Victoria Land and Upper Victoria Valley.	55
Sediment transport history of marine sediment from microtextural analysis, Vestfold Hills, East Antarctica	56
Soil and geomorphology interactions in the Edson Hills glacial valley, Ellsworth Mountains, Continental Antarctica	57
Spatial database development based on metadata and GIS software: Applications for the Brazilian National Institute of the Cryosphere (INCT-Criosfera - Terrantar Center)	58
Study of depositional feature dynamic in periglacial environment	59
The deglaciation of the ice-free areas in the South Shetland Islands. Examples from Byers (Livingston) and Barton (King George)	60
The spatial variability of thermal state of active-layer in Fildes Peninsula, maritime Antarctica	61
The use of proxy data to determine patterns of rock exposure on a nunatak in western Dronning Maud Land, Antarctica	62
Time series analysis applied to active layer thermal regime monitoring at Maritime Antarctica	63
S12. Snow and ice in Antarctica	
Accelerated redox chemical processes of inorganic compounds in frozen state and its impact on polar environment	64
Calcium nitrate in East Antarctic snow: Formation processes and its implications	65
Electric field meter responses for the blizzards and snow falls over Antarctica	66
Preliminary results of stable water isotope analysis of shallow firn cores from the union glacier region	67
Snow depth on Antarctic sea ice: Advancing its satellite remote sensing	68
Spatial and temporal variability of accumulation rate and chemistry of surface snow at East Antarctic ice sheet	69

OPEN SCIENCE CONFERENCE POSTER SESSIONS

Spatial variability of carboxylate ions in Amery Ice Shelf and Princess Elizabeth Land, East Antarctica and their possible sources	70
Spatio-temporal variability of snow surface albedo and grain size derived from airborne and ground-based observations in Antarctica	71
S14. Antarctic climate variability during the past two millennia	
Holocene paleolimnological changes of coastal freshwater lakes in Soya Coast, East Antarctica using fossil diatom assemblages	72
Mid-Holocene transition from an Antarctic to North Atlantic climate pattern on sub-Antarctic South Georgia	73
Oxygen and Hydrogen stable isotopes as climate tracers in the Laclavere Plateau, Antarctic Peninsula	74
Reconstructing the Little Ice Age Conditions in the eastern Ross Sea as captured in the RICE Ice Core	75
Spectral analysis of time series in marine laminated sediments of the eastern basin of Bransfield Strait (Antarctic Peninsula)	76
S15. Solar-terrestrial physics in the polar regions	
Antarctic gravity wave imaging / Instrument network (ANGWIN)	77
Exploration and characterization of earth's electromagnetism and conductivity due to space weather perturbation at polar and equatorial regions	78
Investigation of gravity wave source regions near the south pole	79
On the geomagnetic measurements from Antarctica in the satellite era: The magnetic pole location by ground and space recordings	80
Polar ionosphere status during radial Interplanetary Magnetic Field: a statistical study.	81
Solar flare effects on the geomagnetic field in the South American sector	82
The madrigal distributed database system: Services and features for Antarctic data providers	83
S16. Global navigation satellite system research and applications	
A morphological study of the variation of Total Electron Content (TEC) of ionosphere over the Indian Antarctic base, Bharti	84
Characterization of atmospheric lightning with GPS TEC over the Antarctic Peninsula	85
From solar cycle 23 to solar cycle 24: Twelve years of ionospheric scintillations measurements at Ny-Ålesund (Svalbard Island)	86
Investigation of MSTIDs at midlatitude by GNSS and ionosonde	87
The software defined radio approach to ionosphere monitoring using GNSS: multiple receivers at the price of one	88
S19. Antarctic volcanism in space & time – magmatic, tectonic and palaeoenvironmental aspects & linkages	
An evaluation of geothermal flux along a subglacial volcanic construct in the Executive Committee Range	89
Evidence of an active shallow volcanic source at Mt Melbourne Volcano (Northern Victoria Land) and future perspectives for its monitoring	90
Local seismicity in the vicinity of Mt. Melbourne in Terra Nova Bay, Antarctica	91
Petrogenetic overview of Mount Morning eruptive centre and the Erebus volcanic province, Antarctica	92
Preliminary results of regional volcano - Tectonic activity from hydroacoustic monitoring installed near Balleny Islands	93
Volcanic structures and flexure of the lithosphere in the West and Central Scotia Sea	94
S26. Effects of sea-ice changes and ocean warming on marine ecosystem structure, functioning and services	
Dinoflagellate dynamics in Potter Cove, King George Island, Antarctica, over a 14 months period.	95
Dynamics of landfast sea ice of Atka Bay (East Antarctica) and its relevance to an emperor penguin colony	96
Food availability and energy storage in Antarctic benthic communities: integration of processes through the trophic markers in the Weddell sea	97
Physiological effects of iron limitation on diatom-dominated phytoplankton assemblages in the Antarctic Peninsula region	98
Spatial variability in photophysiology, primary production rates and phytoplankton community across the western Antarctic Peninsula in 2013 late summer	99
Wintertime sea ice controls on summer stratification and productivity at the Rothera Time Series, western Antarctic Peninsula	100
S33. The role of humanities and social sciences in Antarctic studies	
"The role of universities in strengthening Malaysia's interest in Antarctica and southern ocean"	101
A new governance: International environmental protection policy incorporating science diplomacy from Antarctica	102

OPEN SCIENCE CONFERENCE POSTER SESSIONS

Antarctica as Science, Art and Politics Laboratory for humanity's balancing act	103
Picturing Antarctica – Contrasting visions of the state of an environment	104
Visual representations of Antarctica in contemporary fine art: Conveyed values and societal impacts.	105
Well-tempered listening: Historical and creative interpretations of Antarctic experience	106
S34. Footprints in Antarctica, and Antarctica's footprint: perspectives from history	
Human history coincides with science: launching a series of publications by the Antarctic Legacy of South Africa.	107
Paw prints in human Antarctic history	108
S38. Scientific advice for policy	
Development of the Antarctic protected areas: Mathematical forecast for 2020	109
Eu-PolarNet: Opportunities for Antarctic research	110
Network efficiency of Antarctic research stations	111
Terrestrial geothermal environments: Science informing policy	112
The evolution of SCAR reports to the Antarctic Treaty on marine acoustic technology and its impacts.	113
